

The Honorable Michael K. Powell
Chairman
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Dear Chairman Powell:

I'm writing to urge you to support the proposed merger between EchoStar Communications and Hughes Electronics. I believe the merger holds tremendous potential for my company in Orem, UT which sells EchoStar's DISH Network satellite TV service. The new company will offer a more attractive product to consumers, and this will mean more business for my company.

I can offer local broadcast channels to all of my customers when they subscribe to the DISH Network. This is not the case for retailers in medium and small-sized markets. Currently, EchoStar offers local broadcast service in only 36 television markets. The merger will allow the new company to end the duplication of programming and free up hundreds of channels allowing consumers in all 210 television markets across the country to receive their local broadcast channels. As a DISH Network retailer, I am very excited by this development because satellite TV will be perceived nationally as real alternative to cable.

If the merger is approved, the new EchoStar will provide consumers in my area an affordable high speed Internet access service via satellite. There are a small number of customers in my area who do enjoy access to high-speed Internet access service via cable and DSL service. For them, this merger will result in increased competition in the broadband market, potentially driving down prices of DSL and cable providers. However, the majority of the homes, schools and businesses in my area are beyond the reach of cable and DSL wires. For these customers, the new EchoStar would be their only chance of getting an affordable high speed Internet service.

My customers chose satellite TV over cable because of its superior customer service, better quality picture and sound, and the abundance of channel options. However, cable companies now offer digital cable in millions of homes. This has negated the past advantages of satellite over cable TV and has begun to hurt EchoStar and DIRECTV's ability to compete. The new company will have the resources, spectrum and satellites necessary to offer a competitive satellite TV product, improving customer service and keeping cable prices in check.

High Definition Television (HDTV) was supposed to be available to the American public today, but consumers are still waiting for broadcasters and cable operators to provide the service. EchoStar and Hughes have pledged to use some of the available spectrum to increase their HDTV channel offerings, more than tripling their current HDTV offerings. I am excited because greater availability of HDTV programming will translate into more sales opportunities for my HDTV televisions and related products.

The merged company will provide consumers with a lot of new services, but the availability of an affordable, nationwide high-speed Internet access product in

the near future is the most important one to me. It is for this reason that I urge you to support the merger of EchoStar and Hughes Electronics.

Sincerely,

Christopher Cook
